

# THE "EL-DEBA'RA-ON'AN" SPECIAL RESHEL CENTRAL CREATION-REALM

## COSMIC "HONEYCOMB" CELLS AND NESTING as a COSMIC ARCHETYPAL CREATION SYSTEM.

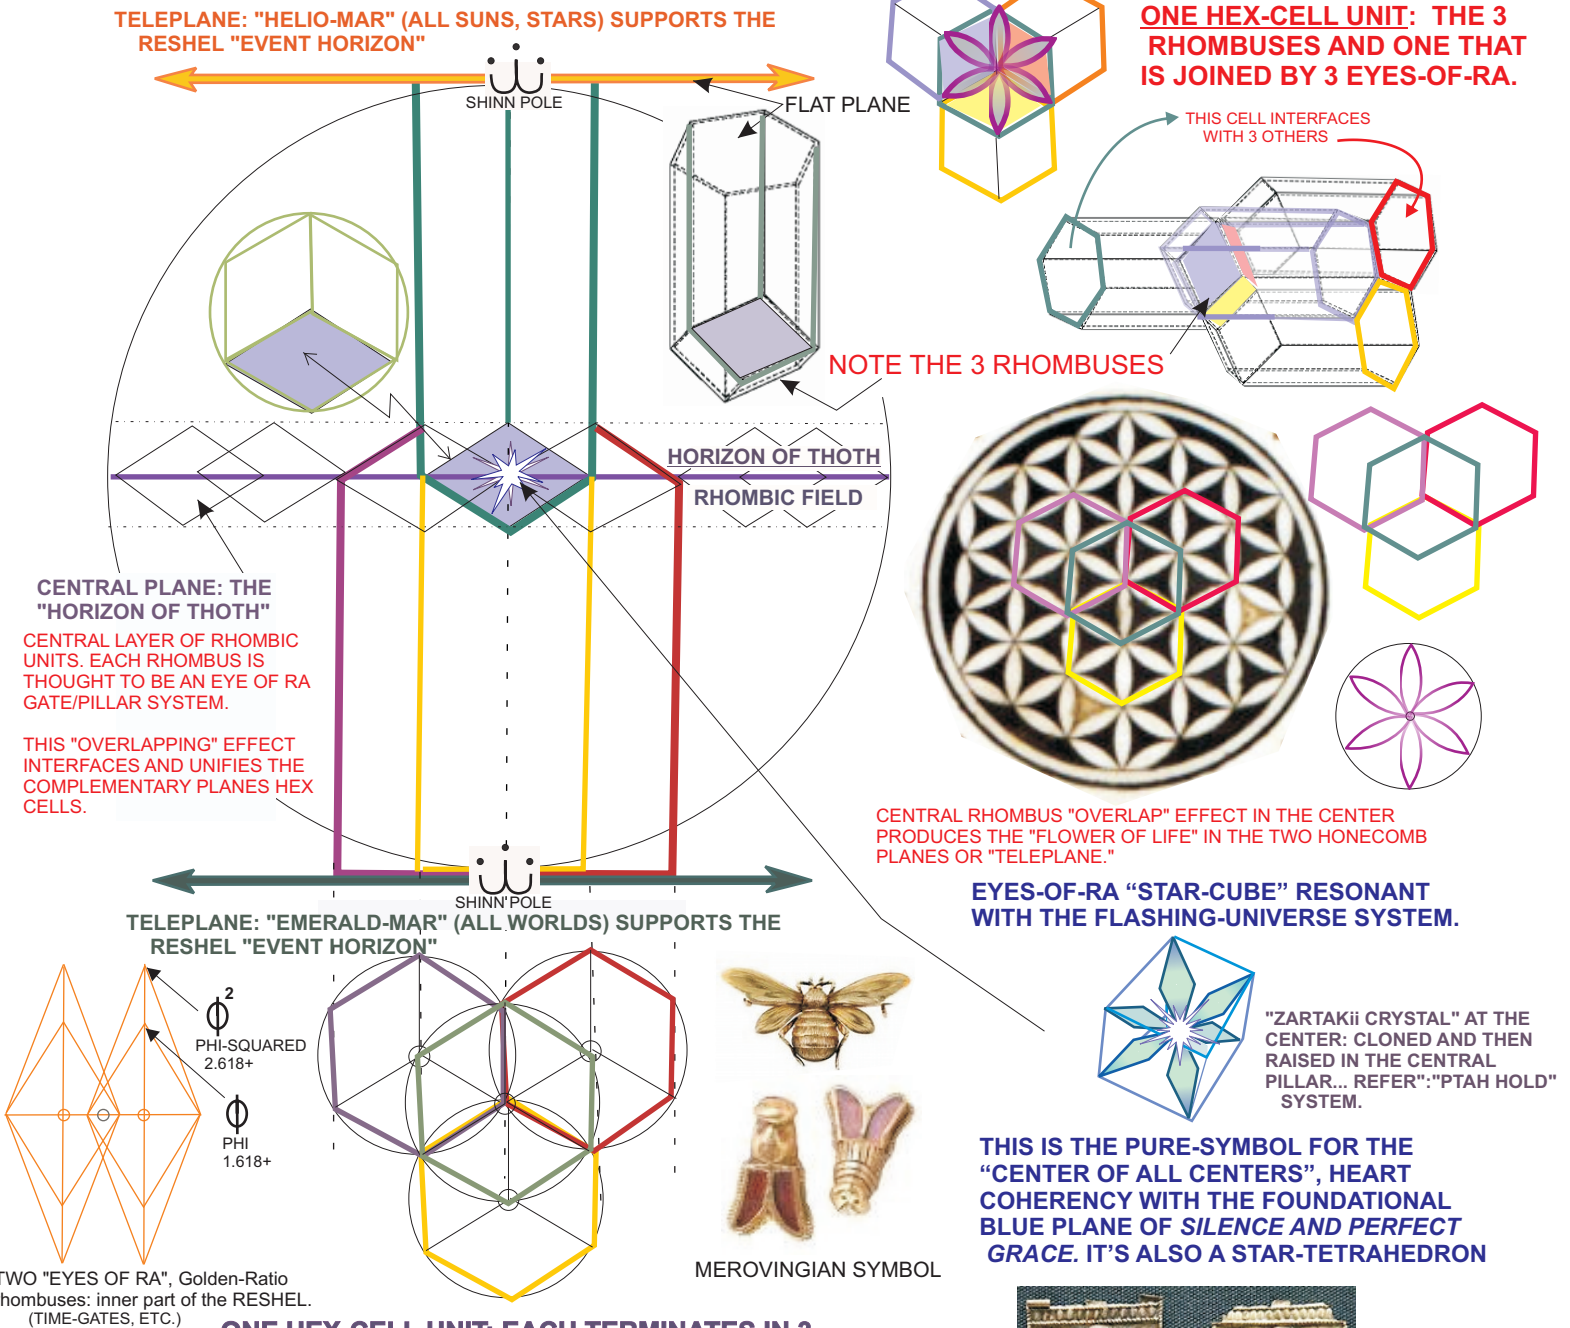

THIS SYSTEM CENTERS RESHEL FORMATS BETWEEN THE EVENT HORIZONS BUT IS NOT USUALLY SHOWN.

### The three-dimensional geometry of a honeycomb cell mimic the real Creation-Realm RESHEL central system:

The closed ends of the honeycomb cells are also an example of geometric efficiency, albeit three-dimensional and little-noticed. The ends are trihedral (i.e., composed of three planes) pyramidal in shape, with the dihedral angles of all adjacent surfaces measuring 120°, the angle that minimizes surface area for a given volume. (The angle formed by the edges at the pyramidal apex is approximately 109° 28' 16" (= 180° - arccos(1/3)).) From Wikipedia, the free encyclopedia

The shape of the cells is such that two opposing honeycomb layers nest into each other, with each facet of the closed ends being shared by opposing cells.

### Opposing layers of honeycomb cells fit

Opposing layers of honeycomb cells fit together.

HUMAN IN A BEE STRONGLY SUGGESTS THAT THE BEE IS A SHAMIR-FIELD. THIS IS A MAJOR ASSUMPTION.
